

# ASL Flashcards - Printing Instructions

1. We recommend printing on card stock or thicker paper to make the cards stiffer and more durable. Laminate the pages if desired for added protection.
2. The PDF files are best printed in Adobe Acrobat. (Note: **Apple users must** use Adobe Acrobat for proper printing results).
3. Make sure the PDF is **printed double sided** such that the ASL Handshape is on the back of the picture of the object or action. Ensure that the printer **flips the pages on the short edge**.  
\*Note that the handshape pages are set up as a mirror image of the word/image pages in order to accommodate double-sided printing.

4. i. The default printing orientation (Auto) should show the print display as such:

- ii. If not, set the printing orientation to **Landscape**.

5. Cut along the dotted lines.

\*The asterisk (\*) beside a word in the master wordlist indicates alternate handshape or finger spelling.
